

PARKS & recreation

LAND DEVELOPMENT
& PLANNING

Parks and recreational facilities embody our beliefs about community and growth, offering us the opportunity to reconnect with ourselves, our families, our neighbors, and our environment. At WithersRavenel, we believe that creative, informed, and dedicated minds can transform parks, trails, and open spaces into inclusive places that improve the quality of life for all.

We bring together planning, architecture, landscape architecture, engineering, and ecological science to tackle the challenges of accessibility, education, sustainability, and environmental stewardship in a collaborative setting. We also guide clients through the process of obtaining and administering funding to help bring their visions to life.

From concepts to concrete, we create vibrant and sustainable facilities that promote the well-being of individuals, communities, and the environment.
