NEPA DOCUMENTATION

national environmental policy act

Projects that have received, or have the potential to receive, federal funding must satisfy the requirements of the National Environmental Policy Act (NEPA). Selecting the appropriate level of documentation based on the environmental impact and the complexity of the project is critical to success, and WithersRavenel has the expertise to make this determination. From there, our staff guide clients through selecting and evaluating alternatives, including the environmental effects and mitigation requirements, and obtaining and addressed feedback from the public, stakeholders, and regulatory agencies.

Our clients receive peace of mind that NEPA requirements have been met on their roadway, intersection, sidewalk, greenway, and multi-use trail projects.
