## FACILITIES

Roadways without sufficient accommodations for bicyclists and pedestrians pose an increased risk of accidents. WithersRavenel supports projects that move non-motorists away from vehicle travel lanes to promote safety and expand overall connectivity.

We combine traditional design with green infrastructure and Low Impact Development strategies for sustainable solutions as well as educational opportunities. As a multi-disciplinary firm, WithersRavenel creates the kinds of places that people want to visit and provides a safe and scenic way to get them there.
